Instinct on a journey of possibilities.

** The Samsung Instinct™ (SPH-M800) supports Bluetooth Profiles for wireless handsets, hands-free accessories, and object exchange. Both handset must be compatible with object exchange profile. Copyrighted material cannot be transferred.

It's your lifeline

Text your coworker that you'll be in a little late today. Start the morning a little differently. Catch the bus you never take over the bridge to the other side of town. Discover a whole other city. Wave at little old ladies walking their miniature poodles. Hang out at a little café and have a cannoli and espresso.

[explore Touch](#)

Touch Screen

The Instinct™ has an advanced touch screen that reacts in a tactile way in response to your touch. It also works with a stylus.

QWERTY keyboard

Access the Instinct's on screen QWERTY keyboard in landscape or portrait mode (you can switch between the two). It takes messaging to a whole new level.

explore live TV

It's your update

You take the long way to work down a sunny block. An idea comes to you about that hot potato, the project no one wants to touch. Something tells you to check the latest news, so you watch live TV on your Instinct. Bingo, you're up to date on the facts and the team loves your idea.

Full HTML Browser

Surf the web faster using the Instinct's built-in full HTML browser. View your favorite sites and even bookmark them.

Speed

Using the super fast Sprint network and Sprint Power Vision® Services, you can get the most out of your wireless service. And with the built-in full HTML browser, the entire internet is yours to surf. Anytime. Anywhere.

back to the journey

It's your way home.

On a lark, you take a late evening stroll around downtown. The cobblestones under your feet echo like you're in a movie. You lose yourself in the winding streets. You can easily find your way home via GPS, but your instinct says stay lost a little longer.
